

SOLUTIONS&SERVICES

In order to better solve the problems of our customers and society, we have established a comprehensive service system encompassing planning, development, manufacturing, engineering and maintenance. Close coordination of our sales, development, manufacturing, and service locations in Japan and overseas ensures that customers' opinions and needs are quickly and optimally reflected in our solutions, and that the azbil Group continues to create new value.

Energy Management Solutions

Drawing upon the combined capabilities of its three business segments the azbil Group offers environmental and energy-saving solutions which span the entire flow of energy from source to the consumer. With our unique products and technologies, we support customers' efforts to save energy, conserve electricity, and cut CO₂ emissions.

Building Renovation

Remodeling and improvement of all types of buildings, helping to reduce life cycle costs and improve asset value

Comprehensive Building Management Service

An operations management service featuring remote monitoring 24 hours a day, 365 days a year in order to maintain a comfortable building environment and increase management efficiency

Building Automation Systems Total Maintenance Service

Reliable building operation and reduced operating costs through preventative maintenance based on remote data collection and diagnosis

Multifaceted support for factories and plants

Fast and reliable help for problems related to operational safety, life cycles, and maintenance, among others

Industrial Service Operation Program for factories and plants

Rapid accomplishment of maintenance tasks that facilitate optimal operation

NETWORK

The azbil Group's global network ensures a fast and reliable response to a broad range of customer requirements.

Business Overview

ADVANCED AUTOMATION BUSINESS

The azbil Group helps customers to meet challenges, including energy conservation, safety, quality improvement, and environmental issues. We make workplaces convenient, safe, and comfortable.

We resolve issues at plants, factories, and a wide array of production sites by providing products, solutions, instrumentation, engineering, and maintenance service to support optimal operation of the customer's facilities throughout the life cycle.

- ◆Business Areas
- Petrochemical & Chemical
 - Oil Refining
 - Electricity & Gas
 - Iron & Steel
 - Waste Processing, Water & Sewerage
 - Pulp & Paper
 - Ships & Marine
 - Food & Beverage
 - Pharmaceuticals
 - Automobiles
 - Electrical & Electronic
 - Semiconductors
 - Equipment (Furnaces, Machine Tools, etc.)

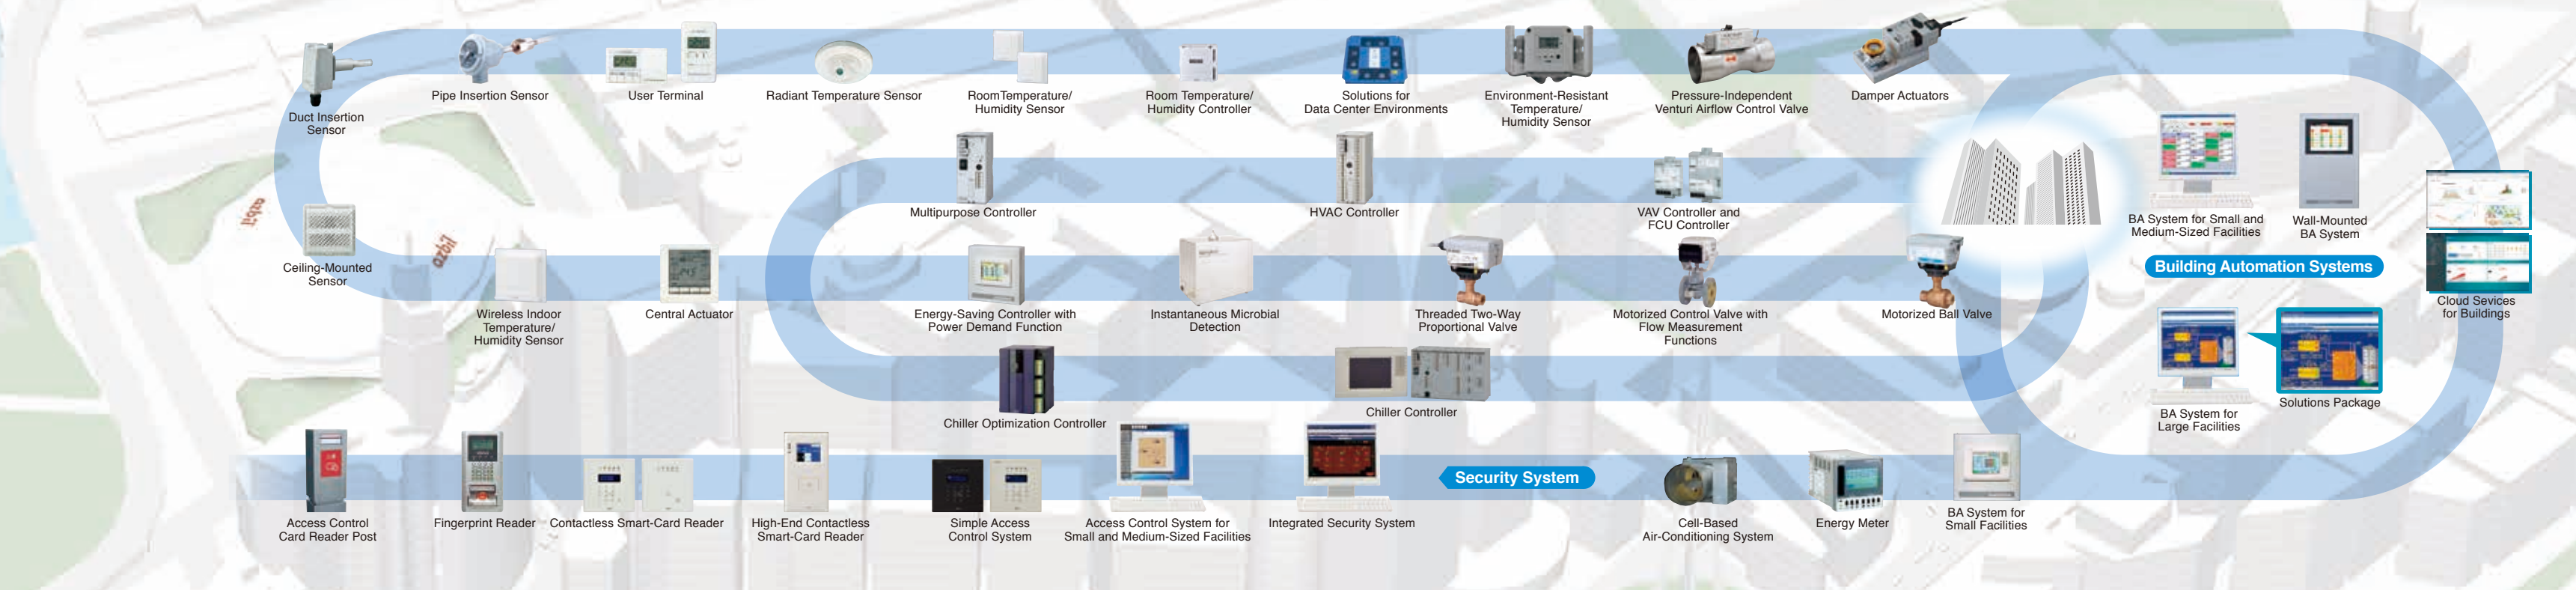

BUILDING AUTOMATION BUSINESS

The azbil Group provides the comfort, functionality, and energy efficiency that every building should have. We help improve the asset value of buildings.

We deliver high performance and high quality based on our in-house development and manufacture of a full product lineup, from building automation (BA) systems and security systems to devices that measure and control the building's facilities. From instrumentation design to sales, construction, engineering, maintenance service, building management and maintenance, and energy conservation, we offer solutions.

- ◆Business Areas
- Office Buildings
 - Hotels
 - Shopping Centers
 - Hospitals
 - Schools
 - Research Facilities
 - Factories
 - Data Centers
 - Government Buildings
 - Airports

LIFE AUTOMATION BUSINESS

The azbil Group utilizes measurement and control technologies to help people to live with greater safety, peace of mind, comfort, and energy efficiency. With measurement, control, and metering technologies cultivated over many years in the building, plant, and factory markets, and service by a warmhearted staff, we provide support for essential areas such as gas and water supply, life sciences research, pharmaceutical and medical fields.

- ◆Business Areas
- Gas
 - Water
 - Factories
 - Commercial Buildings
 - Pharmaceutical Plants
 - Research Facilities
 - Hospitals
 - Condominiums
 - Housing
 - Municipalities

Life Science Engineering

New solutions for safer manufacturing environments and higher quality and productivity in the pharmaceutical industry, helping to maintain human health and welfare.

Pharmaceutical Manufacturing Equipments

City Gas and LP Gas Meters

Gas meters, gas alarms, and regulators for safe and reliable delivery of energy to homes

Intelligent Gas Meter, LP Gas Meter, Regulator

Water Meters

Accurate, safe, and environmentally friendly meters for tap water

Battery-Type Electromagnetic Water Meter, Water Meter

Central Air Conditioning System for Houses

Central air conditioning keeps the whole house at a comfortable temperature all year round. With an electronic air cleaner, air throughout the house is kept clean, providing a living environment that is healthy and comfortable.
