Fiscal year 2010 (Forecast)	—	—	—	31.50	63.00

Note : Revision of dividends forecast for during this period : No

**3. Forecast of consolidated financial results for the fiscal year ending March 31,2011
(April 1, 2010 to March 31, 2011)**

(Percentage shows the increase/(decrease) from the previous fiscal year.)

	Net sales		Operating income		Ordinary income		Net income		Net income per share
	Millions of yen	%	Millions of yen	%	Millions of yen	%	Millions of yen	%	Yen
Fiscal year 2010	225,000	6.0	16,000	29.2	15,500	22.6	8,200	31.4	111.03

Note : Revision of consolidated financial results forecast for during this period : Yes

4. Other

**(1) Changes in significant subsidiaries during the period
(Changes in specified subsidiaries due to changes in the scope of consolidation) : No**

(2) Adoption of simplified accounting methods and accounting methods specific to preparation of the quarterly consolidated financial statements : No

(3) Changes in accounting principles, procedures and disclosure methods etc., preparing for the quarterly consolidated financial statements (Those to be stated as changes in basis of presenting quarterly consolidated financial statements)

1. Changes associated with revision in accounting standards : Yes
2. Other Changes : Yes

(4) Number of shares issued (common stock)

1. Number of shares issued (including treasury stock)
 - As of September 30, 2010 75,116,101shares
 - As of March 31, 2010 75,116,101shares
2. Number of Treasury stock
 - As of September 30, 2010 1,261,044shares
 - As of March 31, 2010 1,260,779shares
3. Average number of shares (cumulative quarterly period)
 - Six months ended September 30, 2010 73,855,169shares
 - Six months ended September 30, 2009 73,855,915shares

* Description of the situation of the procedures for reviewing quarterly results

This quarterly financial results is not subject to the procedures for reviewing quarterly reports specified in the Financial Instruments and Exchange Act. As of the disclosure of this quarterly financial results, the procedures for reviewing quarterly consolidated financial statements are in progress.

* Regarding the appropriate use of forecast and other special matters

These projections are based on management's assumptions, intent and expectations in light of the information currently available to it, and therefore these statements are not guarantees of future performance. Due to various factors, actual results may differ from those discussed in this document.

(Reference) Non-consolidated

Forecast of non-consolidated financial results for the fiscal year ending March 31,2011

(April 1, 2010 to March 31, 2011)

(Percentage shows the increase/(decrease) from the previous fiscal year.)

	Net sales		Operating income		Ordinary income		Net income		Net income per share

1. Qualitative information on quarterly consolidated financial results

(1) Qualitative information on consolidated financial results

In the second quarter of the current consolidated cumulative period, as a result of the sharp rise in the value of the yen and the slackening pace of the recovery in overseas economies, Japan's economy was still showing signs of uncertainty going forward. However, a modest recovery in manufacturing and capital investment was evident, and overall the economy continued to demonstrate an upward momentum.

Likewise overseas, despite the fact that the tempo of economic recovery appeared to be slowing, steady expansion continued in Asia, led by China. Also, in North America and Europe signs of a gentle recovery were observed. Thus, as a whole, the economic situation moved in a favorable direction.

For the azbil Group, the business environment as a whole could not yet be described as robust. In some sectors recovery has been delayed by market conditions and some uncertainty clouding business sentiment. Nevertheless, business performance has improved steadily as a result of the ongoing recovery in both domestic and overseas economies.

Reflecting a recovery in the manufacturing industry's capital investment environment, azbil Group sales in the second quarter of the current consolidated cumulative period were 99,323 million yen, an increase of 6.3% on the same period last year. Turning to profits, these improved significantly as a result of improving the business structure and increasing sales. Operating income was 3,792 million yen (up 155.0% on the same period last year), and ordinary income was 3,664 million yen (up 158.3% on the same period last year). Net income was 1,285 million yen (a net loss of 207 million yen was recorded for the same period last year).

The results for the individual reportable segments are as follows. From the first quarter of this consolidated fiscal year, "Accounting Standard for Disclosures about Segments of an Enterprise and Related Information" (ASBJ Statement No. 17, March 27, 2009) and "Guidance on the Accounting Standard for Disclosures about Segments of an Enterprise and Related Information" (ASBJ Guidance No. 20, March 21, 2008) have been applied.

For details, please see "(5) segment information" on 12 page of the accompanying materials.

Building Automation Business

In the domestic market, sales continued to be vigorous for products related to new commercial office buildings, mainly in large cities in Japan. However, investment in the refurbishment of existing buildings for the purpose of energy saving (CO₂ emission reduction) continued to be suppressed owing to stagnant market conditions and rising vacancy rates. In the face of stiffer competition, a fall in sales in the market for existing buildings could not be avoided. The situation for the service business was just as challenging; however, sales did grow, in part due to the success of initiatives that included putting added emphasis on proactive sales of small-scale energy-saving solutions.

As regards overseas markets, while there has been a downturn in investments made by Japanese

manufacturers, steady progress was made with developing the market for local companies.

Consequently, BA business sales in the second quarter of the current consolidated cumulative period were 42,191 million yen. A segment profit (operating income) of 2,504 million yen was recorded.

Advanced Automation Business

In Japan's domestic market, significant sales growth was achieved for the Yamatake's factory automation (FA) control products – principally, components for semiconductor and flat panel display (FPD) manufacturing equipment, for machine tools, and for industrial furnaces. As regards the materials-related market, the recovery in demand that had been limited to part of the market – specifically, industries involved with new energy and high-functioning materials – has become evident elsewhere, suggesting a more widespread recovery is on the way. Nevertheless, it takes time for orders to work through, and as sales are yet to recover there was a fall in sales. Turning to overseas markets, demand is overall showing signs of recovery, and sales grew sharply.

As a result, AA business sales in the second quarter of the current consolidated cumulative period were 37,873 million yen. Segment profit (operating income) was 1,108 million yen.

Life Automation Business

The LA business supplies measurement and metering equipment for the lifelines that support modern society, as well as products and services for nursing care and health support. Kimmon Manufacturing – a company that plays a central role in the Lifeline business field and accounts for the bulk of LA sales – has a business that caters to the demand generated by the periodic replacement of domestic gas and water meters, as required by law. Although the demand for city gas meters has remained robust, demand for LP gas meters is now in the downward phase of its cycle; as a result there was a slight decline in sales for Kimmon Manufacturing as a whole.

The Life Assist field – with its nursing care and emergency alert response services – is positioned to benefit from the considerable latent demand that exists in Japan with its increasingly aged population. Nevertheless, this segment continued to face a challenging business environment owing to such factors as cutbacks in welfare budgets by local governments. Countermeasures included strengthening sales efforts and expanding the scope of services, and these efforts were rewarded with increased sales.

The result was that LA business sales in the second quarter of the current consolidated cumulative period were 17,113 million yen. A segment profit (operating income) of 110 million yen was posted.

Others

In other businesses (the importing, buying-in and marketing of inspection and measurement equipment), sales of 2,952 million yen were recorded in the second quarter of the current consolidated cumulative period. Segment profit (operating income) was 74 million yen.

(2) Qualitative information on consolidated financial position

(Assets)

At the end of the second quarter of fiscal year 2010, assets fell by 12,060 million yen compared with the end of the previous fiscal year. Total assets stood at 206,410 million yen. The main factor is the decrease in notes and accounts receivable-trade of 14,040 million yen.

(Liabilities)

At the end of the second quarter of fiscal year 2010, liabilities fell by 9,557 million yen compared with the end of the previous fiscal year. Total liabilities stood at 79,636 million yen. The main factors are notes and accounts payable-trade decreased 5,395 million yen and income taxes payable, etc. decreased 2,991 million yen due to the payment of income tax.

(Net assets)

At the end of the second quarter of fiscal year 2010, net assets decreased by 2,503 million yen. Net assets stood at 126,774 million yen. This principally reflects the fall in retained earnings due to dividends paid and the decrease in valuation difference on available-for-sale securities.

As a result, shareholders' equity to net assets was 60.6% compared with 58.4% at the end of previous fiscal year. Net assets per share declined to 1,694.39 yen compared with 1,728.64 yen at the end of previous fiscal year.

(Cash Flow)

1) Cash flow from operating activities

Net cash provided by operating activities in the second quarter of the current cumulative consolidated accounting period increased 9,607 million yen, resulting in an increase of 3,919 million yen compared with the same period last year. The main factors are the increase in income before income taxes and minority interests and the decrease in income taxes paid.

2) Cash flow from investing activities

Net cash used in investing activities in the second quarter of the current cumulative consolidated accounting period was 89 million yen, an increase of 573 million yen compared with the same period last year. The main factor is the decrease in proceeds from sales of short-term investment securities despite proceeds from sales of investment securities.

3) Cash flow from financing activities

Net cash used in financing activities in the second quarter of the current cumulative consolidated accounting period increased 3,327 million yen, resulting in a decrease of 395 million yen compared with the same period last year. The main factor is the impact of a decrease in outlays resulting from the repayment of loans payable.

As a result, cash and cash equivalents at the end of the second quarter of the current cumulative consolidated accounting period stood at 61,278 million yen, an increase of 5,914 million yen compared with the end of the previous fiscal year.

(3) Qualitative information on forecast of consolidated financial results

The azbil Group's results for the second quarter of the current consolidated cumulative period were, as detailed above in the section titled "Qualitative information on consolidated financial results," represent an increase in both sales and income compared to the same period last year. However, a sense of uncertainty overshadows the future outlook. With the rapid appreciation of the yen, the slowing of the global economy, and the diminishing impact of domestic policies, exports and manufacturing are losing steam, and the economic recovery has slowed to a virtual standstill.

Considering these circumstances, the azbil Group will continue to make concerted efforts to fortify the business structure and to effectively use and curb expenditure. While striving to achieve earnings targets, the Group will take advantage of the results of the previous business operation reform initiative ("creating new work styles") and develop businesses – linked to the environment and energy saving, as well as in overseas markets – that can make optimum use of the azbil Group's unique capabilities to deliver solutions. In this way, the Group aims to expand during the "period of growth," as designated by the current Medium-Term Plan (FY2010–FY2013).

Regarding the outlook for the whole financial year, it will be necessary to take into account first half results, expected changes in the business environment, and that minor corrections will be made for different segments. Nevertheless, consolidated sales and operating income are on track to meet the initial forecast (as announced on May 7, 2010), and the entire azbil Group is united in its commitment to ensure that this is achieved.

(Hundred millions of yen)

		Revised forecast	Original forecast on May 7, 2010	Difference	%	(Reference) FY2009
Building Automation	Net Sales	1,030	1,050	(20)	(1.9)	966
	Operating income	124	130	(6)	(4.6)	115
Advanced Automation	Net Sales	840	830	10	1.2	769
	Operating income	32	25	7	28.0	5
Life Automation	Net Sales	340	350	(10)	(2.9)	347
	Operating income	3	5	(2)	(40.0)	3
Others	Net Sales	50	38	12	31.6	53
	Operating income	1	0	1	-	(0)
Consolidated	Net Sales	2,250	2,250	-	-	2,122
	Operating income	160	160	-	-	123
	Ordinary income	155	157	(2)	(1.3)	126
	Net income	82	95	(13)	(13.7)	62

These projections are based on management's assumptions, intent and expectations in light of the information currently available to it, and actual results may differ owing to various factors.

2. Other

(1) Changes in significant subsidiaries during the period (changes in specified subsidiaries due to changes in the scope of consolidation): No

(2) Adoption of simplified accounting methods and accounting methods: No

(3) Changes in accounting principles, procedures and disclosure methods etc.

• Change in accounting standards

Application of the accounting standards regarding Asset Retirement Obligations.

Effective from the first quarter ended June 30, 2010, the company has applied "Accounting Standards for Asset Retirement Obligations" (ASBJ Statement No. 18, March 31, 2008) and "Application Guidance on Accounting Standards for Asset Retirement Obligations" (ASBJ Guidance No. 21, March 31, 2008).

Then, operating income and ordinary income decreased 12 million yen, respectively, and income before income taxes and minority interests decreased 278 million yen. Change in amount of asset retirement obligations after applying this accounting standard is 149 million yen.

- Change in disclosure method

Items regarding quarterly consolidated statement of income

1. Pursuant to the “Cabinet Office regulations for amending part of the regulations regarding the terms, forms, and production methods of financial statements, etc.” (Cabinet Office Edict 5; March 24, 2009) based on “Accounting Standards for Consolidated Financial statements” (Corporate Accounting Standards No. 22, December 26, 2008), the items of “quarterly net income before minority interests” are described in the consolidated statement of income for the first quarter of the consolidated cumulative period.
2. “Subsidy income” (21 million yen for the second quarter of the current consolidated cumulative period), which was categorized into non-operating income for the same period last year, is categorized into “Other” from the second quarter of the current consolidated cumulative period, because its amount is not significant.

Note:

1. Classification method of business segments

The business segments have been classified, based on the classifications of the azbil Group used for internal control purposes and by taking into account the product lines and similarities of markets and other factors. The business segments are the Building Automation business, which primarily deals with building automation; the Advanced Automation business, which focuses on process automation, factory automation and the sales of control products; the Life Automation business, which utilizes automation technologies in areas closely related to everyday life and social infrastructure; and Others, which includes all other businesses.

2. Main products by business segment

Segment	Main products
Building Automation	Network Building Management System, wide area management system, HVAC system for each type of buildings, Critical Environment System, application package for energy management, security access control system, HVAC controller, plant controller, HVAC control device, wireless sensor, temperature/humidity sensor, energy saving and environment monitoring sensor, Instantaneous Microbial Detection™, HVAC control valve and actuator, building energy management system, maintenance service, consulting service.etc.
Advanced Automation	Distributed control systems, Market-specific solution packages, Energy management systems, Facility diagnosis equipment, Differential pressure transmitters, Electromagnetic flowmeters, Analyzers, Control valves, Controllers, Recorders, Indicators, Converters, Combustion control equipment, Earthquake sensors, Micro Flow™ sensors, Photoelectric sensors, Proximity sensors, Limit switches, Microswitches, Mechanical switches, Electronic air cleaners, Maintenance services, Consulting services.etc.
Life Automation	city gas meters, LP gas meters, water meters, emergency dispatch service, Nursing care service, Commercial-use food waste processing and recycling, Residential central air-conditioning system.etc.
Others	Precision Machine Tools, Dedicated Assembly Machines, Processing Machines, Measuring Instruments, Various Control Products.etc.

3. Changes in accounting principles and procedures

(Six months ended September 30, 2009)

As stated on (3) Changes in accounting principles, procedures and disclosure methods etc., preparing for the quarterly consolidated financial statements of 4. other of qualitative Information and financial statements, the company have applied the "Accounting Standard for Construction Contracts" (ASBJ Statement No. 15, December 27, 2007) and the "Guidance on Accounting Standard for Construction Contracts" (ASBJ Guidance No. 18, December 27, 2007). And in terms of construction contracts commenced during the first quarter of the current consolidated fiscal year, the percentage of completion method to contracts in progress (percentage of completion shall be estimated based on the cost-to-cost method) is applied to contracts for which the outcome of the construction is deemed certain during the period to the end of the first quarter of the current consolidated fiscal year and the completed-contract method for all other construction contracts.

As a result of this change, net sales increased by 2,262 million yen, 675 million yen for BA and AA, respectively. And operating income increased by 1,012 million yen for BA. Operating loss decreased by 166 million yen for AA.

[Geographic segment information]

Six months ended September 30, 2009 (April 1, 2009 to September 30, 2009)

Since domestic sales account for the more than 90% of the total sales of all segments, the notation of geographic segment information has been omitted.

[Overseas sales]

Six months ended September 30, 2009 (April 1, 2009 to September 30, 2009)

Since overseas sales account for less than 10% of consolidated sales, the notation of overseas sales has been omitted.

[Segment information]**1. The summary of the report-segment**

The reportable segments of the azbil Group – identifiable operating segments of the Group's business structure for which financial information is made separately available – are subject to periodic review by the Board of Directors in order to make decisions on the distribution of management resources and to assess performance.

The azbil Group identifies its operating segments using such criteria as business organization, product lines, service content, and markets. This approach results in three separate reportable segments: the Building Automation business, the Advanced Automation business, and the Life Automation business.

The Building Automation business supplies commercial buildings and production facilities with automatic HVAC control and security systems, including products, engineering and related services. The Advanced Automation business supplies automation control systems, switches and sensors, engineering and maintenance services to industrial plants and factories. The Life Automation business supplies lifeline meters as well as products and services related to nursing care/health support and emergency alert response services – all of which are intimately connected with the daily lives of the general public.

2. Sales and profit information every segment

Six months ended September 30, 2010 (April 1, 2010 to September 30, 2010)

(Millions of yen)

	Reportable segment				Others (*)	Total
	Building Automation	Advanced Automation	Life Automation	Total		
Net sales						
(1)Customers	42,104	37,588	16,854	96,547	2,775	99,323
(2)Inter-segment	86	284	259	631	176	808
Total	42,191	37,873	17,113	97,178	2,952	100,131
Segment Profit	2,504	1,108	110	3,723	74	3,797

* "Others" includes the importing, buying-in and marketing of inspection and measurement equipment.

3. The main contents of the difference between reportable segment profit and operating income.

(Millions of yen)

profit	Amount
Total of reportable segment	3,723
Profit in Others	74
Elimination	(5)
Operating income	3,792
