# Stainless Steel Sensing Face Proximity Switch 

Model FL7S $\mid$ The FL7S is a proximity switch having a stainless steel sensing face and housing, and is specially designed for welding applications on the automobile manufacturing line.

-The sensing face is integrated into a stainless steel housing having high shock resistance and superior abrasion resistance

- Switches have a spatter and slag proof special coatingAn electromagnetic field noise elimination circuit is built in
■The lineup includes M8, M12, M18 and M30 models
* Connector-type cables are also available for the FL7S Series. Ex.: PA5-4ISX $\square$ FK-E (incombustible cable) PA5-4ISX $\square$ UK-E (flame-resistant cable)

## ADVANTAGES OF FL7S SWITCHES

## FL7S SERIES ENDURANCE TEST RESUCTS

Two endurance tests were made in order to develop a switch that could meet the severe requirements demanded by users in the field. The FL7S Series has proven to have superior performance in both tests.

## - Sensing face strength tests

## TEST-1

The Metal Brush Test (measurement of abrasion resistance)

Test condition Brush: Stainless steel brush Rotation speed: 130 cycles/min

## TEST-2

Repetitive Shock Test (measurement of shock resistance)

Test condition Brush: Stainless stee brush Rotation speed: 130 cycles/min

With conventional switches, welding sparking leads to hard-to-remove spatter and slag.The big problem is the scratches caused by the abrasive metal brush used to remove the stuck spatter and slag. Azbil has solved this major problem by creating for the FL7S Series a stainless steel sensing face that resists abrasion. The Metal Brush Test shows that this switch has excellent endurance.

Survives 5 min of brushing life. The FL7S Serk when welding parts hit the switch head result in a shortening of switch this problem! The repetitive shock test has proven that this switch has robust shock resistance.

FL7S-5W6W-CN03

- Resistance to electromagnetic field noise from welding! Usable range (for FL7S-2/5/8 Series)

Distance between welding gun and switch

| Welding current(A) <br> (DC or AC) | Distance between welding gun and switch (mm) |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | 12.7 | 25.4 | 51 | 76 | 102 | 127 | 152 | 306 |
| 10,000 | 160 mT | 80 mT | 40 mT | 25 mT | 20 mT | 16 mT | 13 mT | 7 mT |

## PRECAUTIONS FOR USE

## 1. Influence of surrounding metal

Metal other than the target object surrounding the switch may influence operating characteristics. Leave space between the switch and surrounding metal as shown below.

Shaded areas indicate surrounding metal other than the target object.
A: Distance from sensing face of proximity switch to mounting surface
B: Distance from surface of iron plate to sensing face of proximity switch
Dimensions in parentheses apply if a hexagonal nut is attached to the front.
C: Distance from surface of iron plate to center of proximity switch when $A=0$

| Catalog listing | $\mathbf{A ( m m )}$ | $\mathbf{B ( m m})$ | $\mathbf{C ( m m})$ |
| :---: | :---: | :---: | :---: |
| FL7S-1 $\square$ | 0 | 4.5 | 8 |
| FL7S-2 $\square$ | 0 | 6 | 12 |
| FL7S-5 $\square$ | 2.5 | 15 | 16 |
| FL7S-8 $\square$ | 2.5 | 24 | 23 |

## 3. Mounting

| Catalog listing | Max tightening torque (N.m) |
| :---: | :---: |
| FL7S-1 $\square$ | 8 |
| FL7S-2 $\square$ | 15 |
| FL7S-5 $\square$ | 30 |
| FL7S-8 $\square$ | 60 |

## 2. Mutual interference prevention

When mounting proximity switches either parallel to or facing each other, mutual interference may cause the switch to malfunction. Maintain at least the distances indicated in the figures below.

| Catalog listing | A(mm) | B(mm) |
| :---: | :---: | :---: |
| FL7S-1 $\square$ | 16 | 20 |
| FL7S-2 $\square$ | 24 | 30 |
| FL7S-5 $\square$ | 36 | 50 |
| FL7S-8 $\square$ | 60 | 100 |

Before use, thoroughly read the "Precautions for use" and "Precautions for handling" in the Technical Guide on pages $\mathbf{C}-095$ to $\mathbf{C - 1 0 1}$ as well as the instruction manual and product specification for this switch.

Please read "Terms and Conditions" from the following URL before ordering and use.

[^0]:    Ex.: When the welding current is $10,000 \mathrm{~A}$, the switch operates without error even when it is installed as close as approx. 12.7 mm from the welding gun.

[^1]:    * 1: Does not detect non-ferrous metals.
    * 2: Avoid using this switch in an environment always subject to splashing water or oil.
    * 3: AC/DC magnetic field 85 ms or less

[^2]:    Note: When the switch is flush-mounted in metal, be sure to mount it so that the top of the sensing face projects 2 to 2.5 mm from the metal surface.
